ROADSMART IV SPORT-TOURING

USAGE

CONSTRUCTION

Command the road, even in the wet.

Picking up where the RoadSmart III left off, the newest addition to the RoadSmart range continues to give you exceptional durability and handling, while adding massively improved wet performance into the mix. Enjoy improved consistency of performance throughout the tyre's life thanks to the optimised casing ply line. The oil-new compound, optimised footprint and tread design mean you can command the road, even in the wet.

- / Greatly enhanced wet performance compared to RoadSmart III
- / Low steering effort and ultra-fast warm-up
- / GT specs for reduced steering effort on heavier bikes**
- / SP versions for enhanced stability and feedback on sportier and firm-terrain models***
- / Strip-wind tread application for key sizes for reduced tread wear
